The following is a list of the most commonly prescribed drugs. It represents an abbreviated version of the drug list (formulary) that is at the core of your prescription-drug benefit plan. The list is not all-inclusive and does not guarantee coverage. In addition to using this list, you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate.

PLEASE NOTE: The symbol * next to a drug signifies that it is subject to nonformulary status when a generic is available throughout the year. Not all the drugs listed are covered by all prescription-drug benefit programs; check your benefit materials for the specific drugs covered and the copayments for your prescription-drug benefit program. For specific questions about your coverage, please call the phone number printed on your ID card.

KEY

The symbol [INJ] next to a drug name indicates that the drug is available in injectable form only.
 The symbol [SNRI] stands for Serotonin-Norepinephrine Reuptake Inhibitor.
For the member: Generic medications contain the same active ingredients as their corresponding brand-name medications, although they may look different in color or shape. They have been FDA-approved under strict standards.
For the physician: Please prescribe preferred products and allow generic substitutions when medically appropriate. Thank you.
 Brand-name drugs are listed in CAPITAL letters.
 Generic drugs are listed in lower case letters.

THIS DOCUMENT LIST IS EFFECTIVE JANUARY 1, 2009 THROUGH DECEMBER 31, 2009. THIS LIST IS SUBJECT TO CHANGE.
